Summary

I'm a full stack developer with 9 years of experience building scalable web applications. I turn complex problems into clean code, from accessibility-first frontends to type-safe APIs using React, TypeScript, and Node.js.

Experience

Full Stack Developer, Tele2 – Stockholm, Sweden 2021 – present

- Rebuilt login experience across all Tele2 brands to meet WCAG accessibility standards, enabling compliance with EU regulations and expanding user access
- Architected 3 greenfield internal tools (translation sync for Contentful, feature flag platform, QA scenario manager) reducing configuration workflows across dev, QA, and stakeholders
- Migrated multiple legacy applications to a modern 'whitelabel' platform, increasing development speed and component reusability across 20+ React micro frontends and Express APIs
- *Tech: React, TypeScript, Node.js, AstroJS, Azure DevOps*

Backend Developer, Coop – Stockholm, Sweden 2020 – 2021

- Built order intake and payment processing APIs in Spring Boot, serving both online and in-store customer authentication flows
- Integrated E-identification solution enabling one of Sweden's first unmanned grocery stores, delivering seamless customer experience without on-site staff
- *Tech: Java, Spring Boot, Kafka, Vue, React*

Full Stack Developer, Table Check – Tokyo, Japan 2019

- Developed and maintained React frontends, Elixir APIs, and third-party integrations for restaurant reservation platform, shipping features across customer-facing and partner experiences
- Collaborated in cross-functional team with product, design, and QA, delivering restaurant management tools to international market
- *Tech: React, TypeScript, Elixir, Node.js, AWS*

Erlang Developer, Erlang Solutions – Stockholm, Sweden 2017 – 2018

Software Engineering Intern, Ericsson – Stockholm, Sweden 2017

Freelance Projects

Ljusverket – Remote 2024

- Designed and shipped a full-stack rental platform for a film lighting equipment company, delivering customer-facing inventory browsing, user authentication, and light list management using Laravel
- Built admin tooling for invoice and inventory management with Mailgun transactional emails and AWS S3 PDF storage, streamlining back-office operations
- *Tech: Laravel, React, Tailwind, MySQL, Mailgun, AWS S3, GitHub Actions, Digital Ocean VPS*

Education

Royal Institute of Technology, BSc in Computer Science – Stockholm, Sweden 2014 – 2017

Academy of Language Arts, Japanese Language – Tokyo, Japan 2018 – 2019

International English School, English / Swedish Bilingual – Stockholm, Sweden 2006 – 2009

Skills

Languages: TypeScript, JavaScript, Java, PHP, Erlang, HTML, CSS

Frameworks & Libraries: React, Node, Express, Astro, Next, Remix, Laravel, React Query, Tanstack, i18next

Tools: Git, macOS, Linux, VS Code, Claude Code, MCP Servers, CI/CD, Azure, AWS, MongoDB, Postgres, MySQL

Spoken Languages

Swedish: Native

English: Fluent

Japanese: Conversational
